

# Port of Ceuta

# Ceuta

The **key** to the Mediterranean

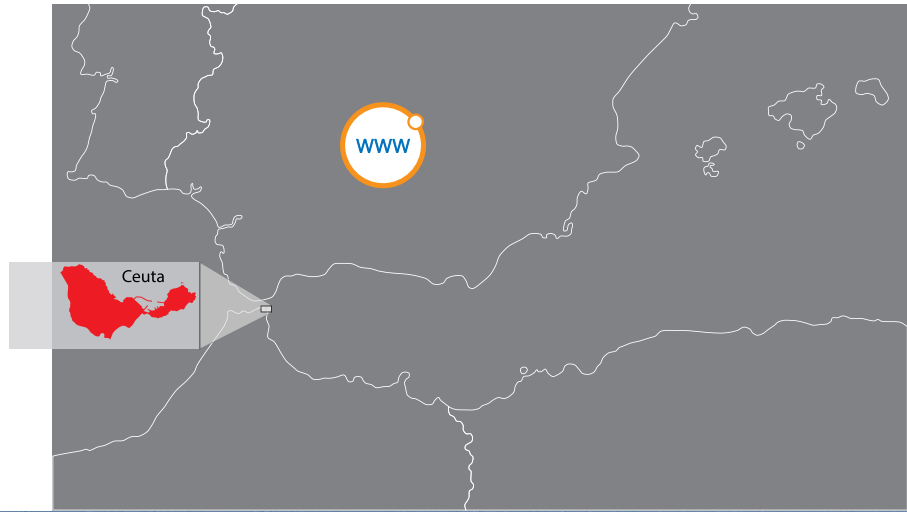

**Autoridad Portuaria de Ceuta**

The **port of Ceuta** is one of the main seaports of the Mediterranean. We are a Spanish port located in the mainland of Africa and we connect with the Strait of Gibraltar offering general, port, commercial and aid to navigation.

# A EUROPEAN PORT IN AFRICA

## A COMMITMENT IS A COMMITMENT

The Port of Ceuta maintains a firm commitment to quality, prevention, environment and energy sustainability, making these four pillars a priority for the port.

### OUR ENERGY POLICY IS:

- > Working to reduce the carbon footprint.
- > Optimising the energy consumption.
- > Working in improving the energy performance.
- > Supporting the development of solutions and efficient alternatives.

## WHY ARE WE SPECIAL?

- > Privileged geographical location in the Strait of Gibraltar.
- > Tax advantages.
- > Great experience in the traffic of passengers, goods and supplies to ships.
- > Leader in freight traffic, bunkering, liquid bulk, passengers and vehicles.
- > Wide offer of lands, infrastructures and services.

*Our responsibility means to work on getting a better world.  
... And our commitment finds the way to do it.*

Our Port goes even further of the sustainability regulations. In addition to this, we have an environmental management system certified according to **UNE-EN ISO 14001: 2004**, we control the quality of port waters through different risk assessment programs, preventive and corrective measures, monitoring and surveillance. We also monitor the air quality and work to reduce the content of hydrogen sulfide in fuels.

### QUALITY, ENVIRONMENT AND SECURITY

- > Efficient and quality services.
- > Improvements in the air and water management.
- > Prevention of environmental pollution.
- > Safe and salutary facilities.
- > Control of the activities in the port area.
- > Improvements and efficiency in all processes.

## BUNKERING: FOR MORE THAN 100 YEARS

The Port of Ceuta is one of the main ports of the Strait for bunkering services thanks to our strategic position, an added value to international navigation routes.

We are specialized in liquid bulk traffic, which includes loading and unloading of fuel and supplying ships. Thanks to the amazing infrastructure of the port, its advanced machinery and the qualification of our professionals, we supply almost a million tons of fuel every year, which makes it a reference point for fuel supply services to ships in the Strait of Gibraltar.

*We know what we do. We are specialists.*

The Port Authority of Ceuta is perfectly working in some **sustainability projects that focus their objectives on respecting people and environment.**

We want to make the port of Ceuta a reference point in fuel supply traffic, fostering the bunkering traffic in our facilities. In order to promote the transition to the decarbonization of maritime transport, **a berth was built for the reception of large ships** and, together with the unload of marine fuels with lower sulphur content we have already started, it allows us to anticipate the regulations, specialize our services and be more competitive.

The **Port Authority of Ceuta is implementing the PERS certification** which is specific of the port sector. It establishes the requirements of the main environmental management standards as well as it considers the port specifications.

*Today, we are among the first ports with regards to fuel supplying in Spain.*

# Expertise and efficiency in the Strait of Gibraltar

**GIBUNCO**  
SHIP AGENCY
